

Name	Reminder Notification
Reference(s)	-
Profile(s)	-
Purpose of Test	To verify that the device starts active reminder and notifies the user defined time before start time.
Test Description	The test is performed by tuning to a service with EPG events, set reminder and wait until created reminder start time is reached. Tester needs to verify that device notifies the user about the active reminder defined time before start time.
Test Equipment	Monitor RCU DUT DVB Signal Generator
Test Streams	A DVB test stream with EPG events.
Test Setup	Connect the stream generator with the device under testing.
Test Preconditions	Start streaming the test stream. Perform an auto scan and tune to service. Stream which is used for testing must contain valid EPG data.
Test Procedure	<ol style="list-style-type: none"> 1. Set reminder. 2. Wait until created reminder start time is reached. 3. Verify that device notifies the user about the active reminder defined time before start time.
Expected Result	Device shall start reminder and notify the user defined time before start time.
